

Geo-Vibro Corer 6000

Compact and portable system

From the backdeck
using A frame plus
onboard winch

The Geo-Vibro Corer
is a very versatile system,
which can be deployed
in many ways.... from
all types of vessels...

Deployment with Crane
from barge

Deployment over the side
with very little free deck space

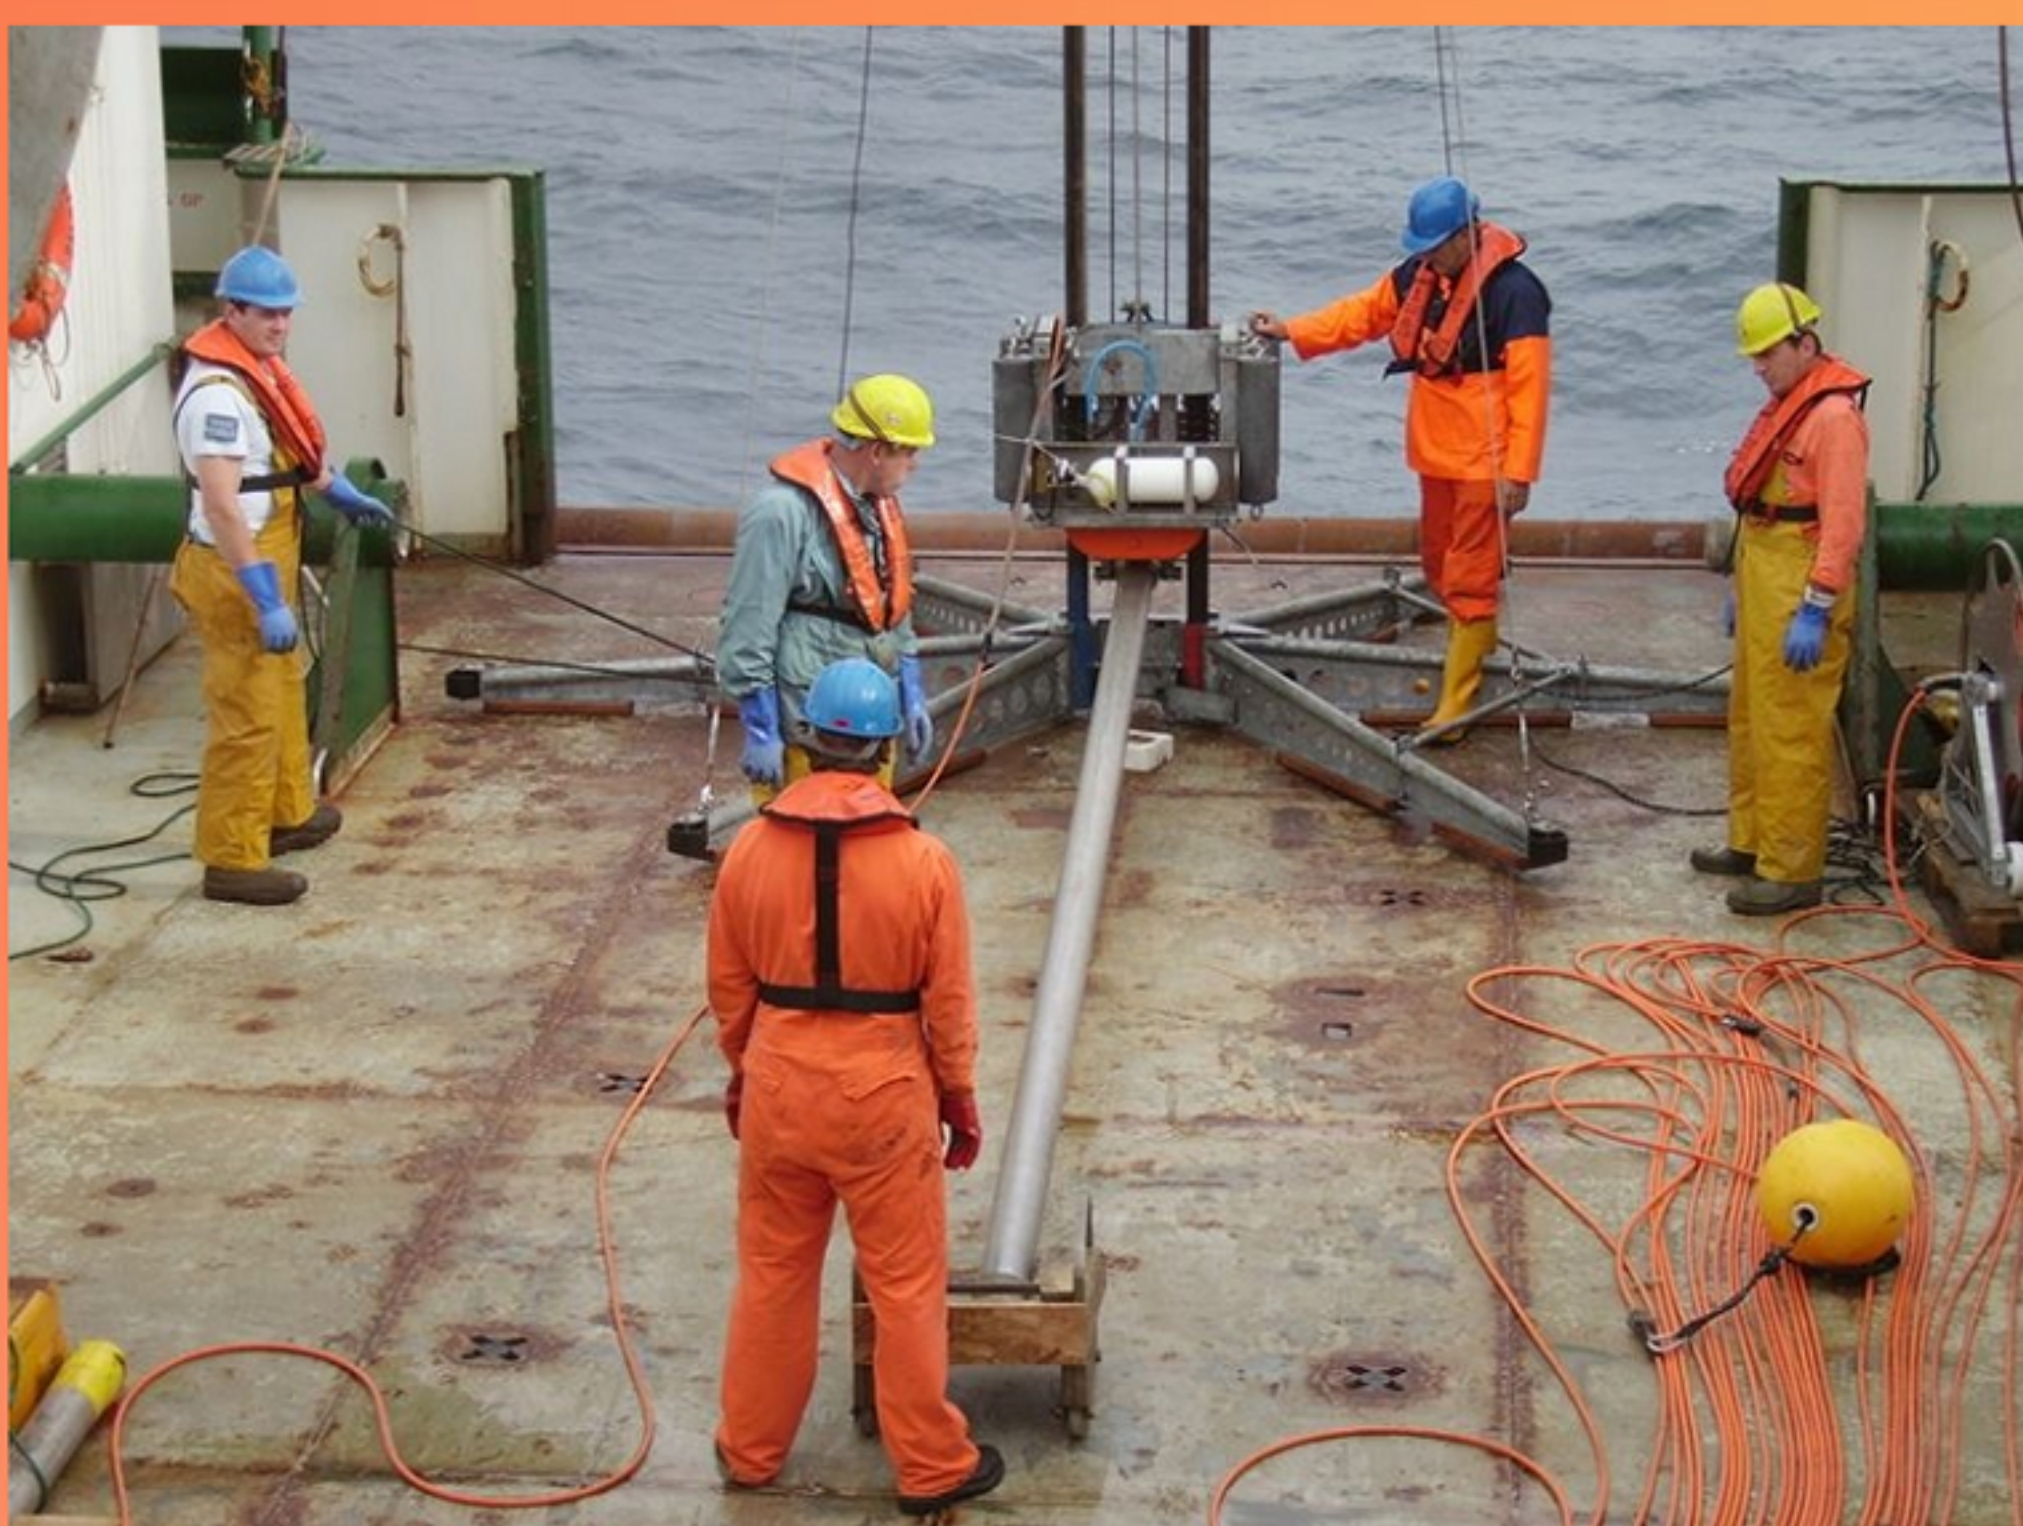

Ideal conditions
with ample deck space

-Main Characteristics

- 3, 6 m standard cores
- pivoting core barrel
- extension to 9 m possible
- 380-440 V, 3 phase
- 6 kW electric power
- 30 kN impulse at 30 Hz

Options:

- ROP & - Depth sensor
- Pitch and roll sensor
- Water injection for onshore and long cores in hard sediments

Easy horizontal retrieval of core
pressure compensated model

Cable Reel c/w Umbilical,
Control Unit, Weights

Pressure Compensated Model
for depth over 250 m
